

## Touch v11.0.008 Restaurant Updates

### Introduction:

Several improvements for restaurants have been implemented in this version. The seat functionality has been updated to flow in a more logical way for ease of use and includes printing seat numbers on kitchen tickets. Consolidated printing for kitchen tickets and receipts has been improved. A new option was added to set courses on departments used for remote printing to sort by course and makes using courses much simpler with KVS. New button command to be able to change the course of the last item entered which gives a solution to get a starter to print in the mains section on the kitchen tickets.

### Seats:

The **Use Seat Numbers** and **No. of Seats** settings are found in the charge sheet configuration screen the same as with previous versions. These settings are used to control which charge sheets use Seats, E.G seats can be used on Tables but not on Bar Tabs. The Use Covers setting should also be enabled for the new Seats functionality.

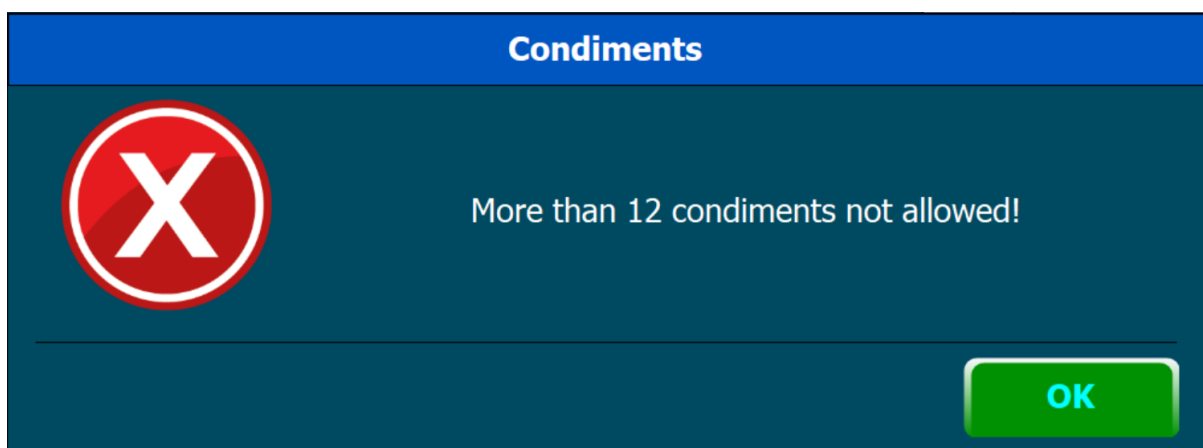

The setting below **Print Seat Numbers on Remote** has been added to v11.0.008 and is used to print seat numbers on remote tickets and to prompt for seat numbers each time a new item is added to the order.

Option	Setting
Section : Remote Printer Settings	
Print Seat Numbers on Remote	YES

The **Select Seat** screen will now be displayed automatically as each new product is added to the order. The number of seats will match the number of covers if entered, the example below is for a table with 4 covers. If covers are not used the list will show the default number of seats set in the back-office charge sheet setting.

When the **Print Seat Numbers on Remote** setting is in use, Condiments are limited to 12 per product using a mixture of Condiments and Sell as Condiments. The warning message below will be displayed if you attempt to add a 13<sup>th</sup> option.

A new button command **SEATNUMBERS** has been added that will open the screen below to show the list of items entered before the charge sheet has been stored. The **Change Seat** button can be used to change the seat number on any line if the wrong seat number has been entered by mistake.

Description	Qty	Seats
Buffalo Wings	1	1
Garlic Mushrooms	1	2
Soup Of The Day	1	3
Soup Of The Day	1	4
Fish and Chips	1	1
Lamb Shank	1	2
Medium Rare		
Jacket Potato		
Peppercorn Sauce		
Grilled Salmon	1	3
8oz Fillet Steak	1	4
Medium		
Jacket Potato		
Bearnaise		

Below is an example kitchen ticket with the **Print Seat Numbers on Remote** setting enabled.

```

## Courses:

The Course functionality is another area that has been improved.

New option below added to the **Sort remote output by setting** to be able to sort by **Course**.

Option	Setting
Section : Remote Printer Settings	
Sort remote output by	Course

The Course on the above setting is picked up from a new department setting where you can allocate a Course to each department as shown below.

Department Details

### Product Departments

**Edit by Grid**

Department Code: 0101 **Search** ☐ Default Department

Description: Starters ☐ Dineout Discount

Group: Starters **Add** ☐ Use in Ordersoft

Sequence: 999

Course: Starter

Lalo Amount: 0.00

Halo Amount: 0.00

Max. Discount (%): 0.00

Loyalty Points: 0 per Pound

Margin (%): 0.00

Course dropdown options: Starter, Starter, Post Starter, Main, Dessert, Coffee & Bill

A new button command **X\*COURSE** has been added that allows you to change the Course of the last item added. E.G Main is Course number 3 so the button command would be **3\*COURSE**. The pop-up message below will show when the command is used.

001 M 01 14/11/2023 11:31 ADMIN Items: 4 Table: 4 Covers: 2 Remote: 1- OFFLINE

Table: 4

Qty	Description	Price
1	Prawn Cocktail	£5.00
1	Soup Of The Day	£5.00
1	Fish and Chips	£15.00
1	Buffalo Wings	£5.00

**£30.00**

**Change Course**

Starter Changed to Main!

OK

Buffalo Wings, Garlic Mushrooms, Prawn Cocktail, Soup Of The Day

MAIN, FREETEXT, CHANGE SEAT, £10, £5

X, 1, 2, 3, 4, 5, 6, 7, 8, 9, 0, CLEAR, SUB TOTAL, EXIT

The example kitchen ticket below shows the last item Buffalo Wings printing in the Main section instead of the Starter section after using the **3\*COURSE** button command.
